Is your child prepared to succeed in our ever-changing world? FasTrackKids teaches preschool and early elementary school-aged children 4 - 8 years old to use creativity, communication, critical thinking and collaboration skills through fun, interactive activities. Using the FasTrack Learning Station®, children explore 12 subjects ranging from traditional topics such as biology, astronomy, and art as well as subjects not usually covered in early learning like economics, technology, and goals & life lessons. Classes held once a week for two hours give your child the necessary skills to succeed in school and in life. A modular curriculum allows for enrollment of a student at any time.

Children are naturally curious so why not let them discover something new? FasTrack Discoverers is a multi-day “adventure” for children ages 3-5 that is a great alternative or supplement to more play-based preschool programs. FasTrack Discoverers encounter up to 9 different elements during a lesson through which they are exposed to Educational Zigzagging™. This teaching method allows children to gather information through exposure to visual, auditory and kinesthetic learning, meeting the needs of various learning styles. During the literacy and math portions of the class, children are exposed to phonics, simple words, writing, simple addition and subtraction, and time and money. Music activities that integrate movement, rhymes and songs provide a creative outlet in every class.

Enopi is a systematic, individualized program for children of all abilities utilizing a unique and proven learning method. This allows each child to have a customized starting point depending on their ability regardless of his/her age and/or school grade. Each child’s study progression will depend on their own learning style and pace. Enopi focuses on each student’s foundation in math and English, as well as helping students gain self confidence, interest in learning, and develops a child’s critical thinking and analytical skills.

Isn't it wonderful how young children have so much curiosity? Our toddler program allows children 2-3 years old to constructively develop their curiosity as well as their communication, concentration, self esteem and social skills. Children participate in our early learning classes using songs, movement, and hands-on activities one hour per week. FasTrack Tots prepares children for pre-school and gives them a seamless transition into FasTrackKids.

Handwriting Without Tears® is a proven success in making legible and fluent handwriting an easy and automatic skill for students. Our curriculum uses hands-on, educationally sound instructional methods to teach handwriting. The result truly is handwriting without tears!
